

Integrating Breast Cancer Screening into FP/RH Women's Outreach

Private Sector Project for Women's Health Jordan 2005-2010

Funded by USAID contract number GPO-I-00-04-00007-00 Task Order 802

Hashemite Kingdom of Jordan

- Population 6.1 million
- GNI per capita \$5,530
- Literacy 91.1%
- TFR 3.6
- Modern CPR 42%

Project Objectives

- 1. Increase demand for and use of modern contraception and related women's health services.
- 2. Improve private sector service quality and access.
- 3. Early detection of breast cancer.
- 4. Address violence against women.

Outreach Across Jordan

- 1.1 million women age 15 60 (est 825,000 MWRA)
- 2-7 visits door to door by 140 NGO health workers
- Referral to all services MOH, NGO's, RMS, UNRWA, pharmacies and network of private doctors and clinics
- Vouchers for high risk low income FP and breast cancer

Registration, maternal risk, general health issues

- Discuss FP methods, referral points

Service access: % referrals sent vs site acted upon:

Provider	% Family Planning by Provider	% Family Planning Acted Upon by Provider	
МОН	58%	44.6%	
JAFPP	10.8%	9.8%	
Private Doctors	18.7%	15.6%	
Pharmacy	2.4%	13%	
UNRWA	8.8%	14.4%	
RMS	1.4%	2.5%	

Improving Private Provider Services

- In-class & Clinical Training for CME
- FP counseling, IUD insertion, Pap smear, gyne ultrasound, clinical breast exam
- Quality assurance program for FP, RTI/STI's, Breast Cancer

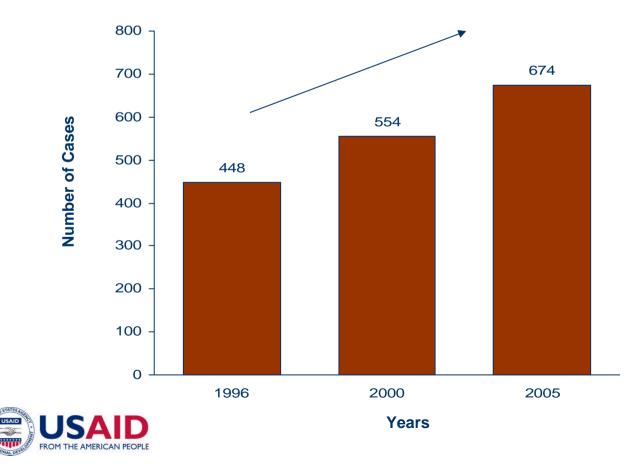

OUTREACH – Family Planning Achievements

	Achieved	End of project Target
Total women reached	778,500	1,100,000
MWRA:	560,470	825,000
F.P referrals acted upon: F.P vouchers acted upon:	64% 53% 81,148 or	
Modern Method New Acceptors:	14.4% of MWRA visited	
FROM THE AMERICAN PEOPLE		

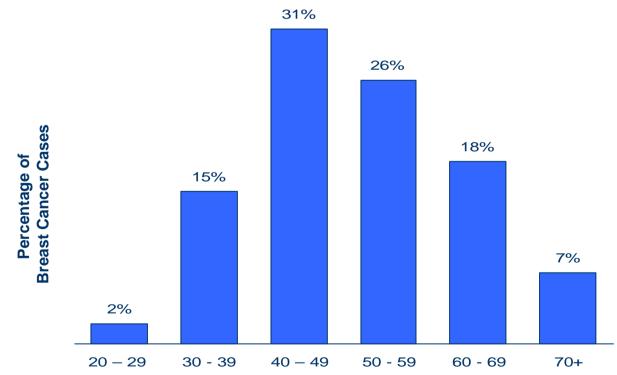

Breast Cancer - major cause of death in women in Jordan

Reported New Cases of Breast Cancer

Breast Cancer age is younger in Jordan

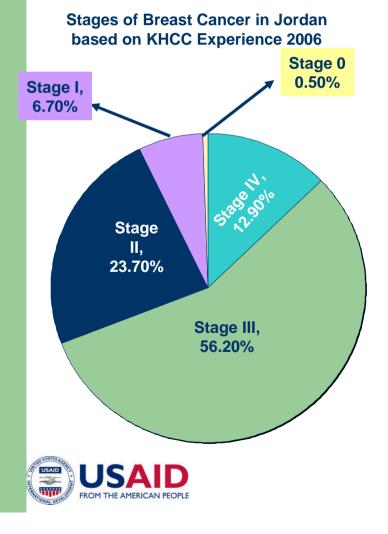

Distribution of Breast Cancer Cases Over Age

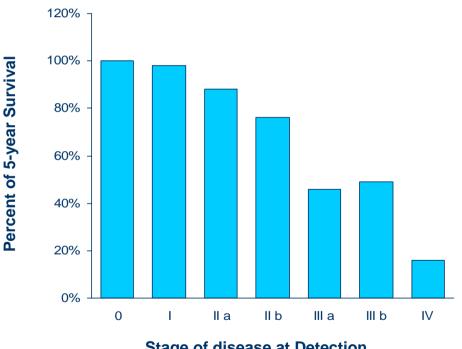

Age

70% found in late stages: high mortality rate

Correlation of Survival to Stage at Detection

Stage of disease at Detection

Early Detection programs

"Downstaging"

"Screening"

- Finding symptomatic cases
- Education & awareness
- Self Breast Exam, Clinical Breast Exam
- Referring cases for diagnostic mammogram and biopsy

• Finding cases stage 0 - II

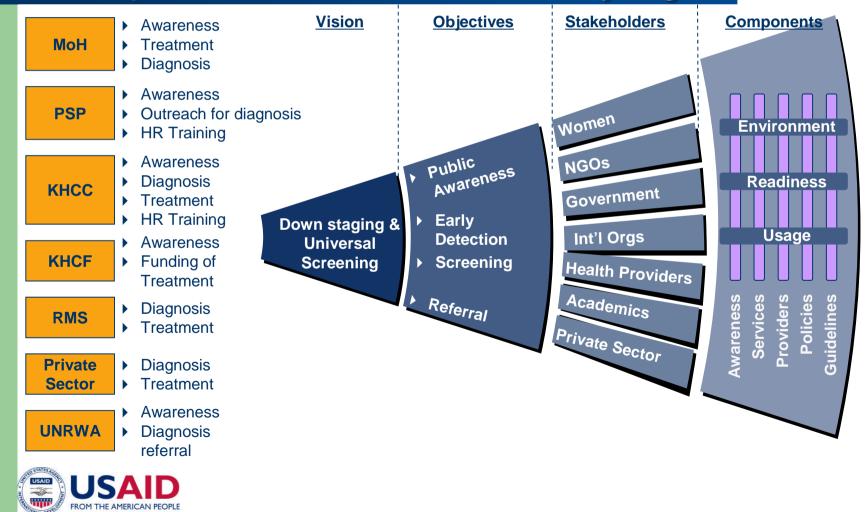

- Mammogram can find 3 years earlier than CBE
- Opportunistic or Universal
- Needs high quality referral system
- Policy guidelines: all women 40-59 (for cost efficiency)

Increases survival 17-20%

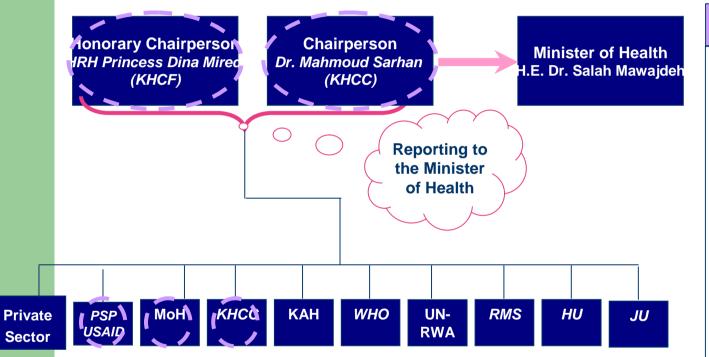

Increases survival 20-40%

Partnership: to detect 70% breast cancer in early stages

National Breast Cancer Committee

Members of the National Committee form the Executive Board

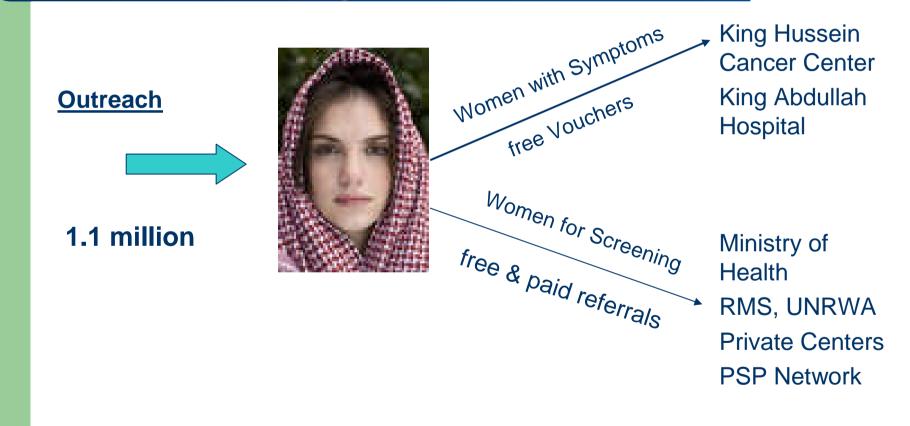

Committee governs the overall goals and approach of the Program and ensures participation of stakeholders • The Executive **Board manages** the daily activities of the program, provides guidance to the team, and

Remarks

The National

oversees funding and expenditure

PSP Breast Cancer Program

Teaching Breast Exam, Referrals for symptoms

Motivation to act early is key to survival

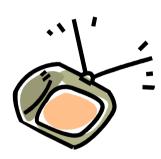

Research shows us

- Lack of Knowledge
- General public fear of "cancer"
- Denial and Fear of Loss
 - Of womanly image
 - Of husband's support

Behavior Change Communication

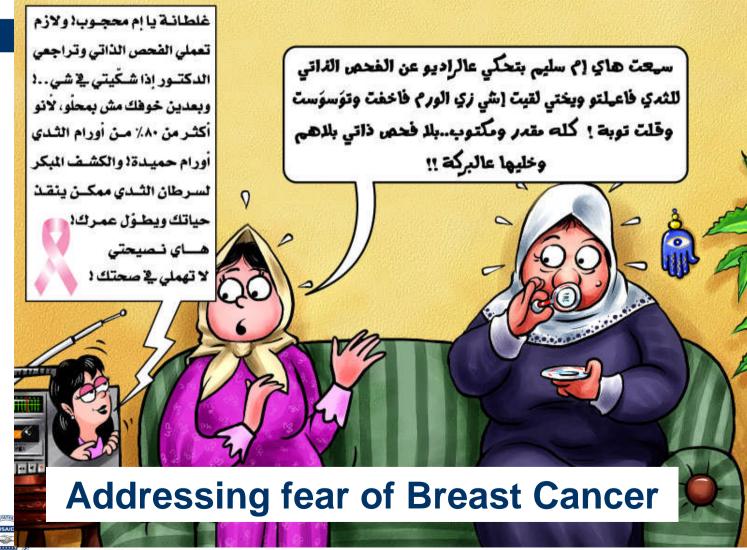

- Early Detection
- Teaching Self Breast Exam
- Regular Screening
- Risk Factors
- Referral sites

FROM THE AMERICAN PEOPLE

Setting up the referral system Private Sector Ministry of Health

- Screening Guidelines
- Training and quality assurance standards
- Include breast exam with FP services
- Pilot Network of 7 private mammogram facilities
- Training technicians

Policy for clinical breast exams and referrals.

- Training doctors, nurses & midwives
- Adding 21 mammograms, plus technicians
- Training, quality controls

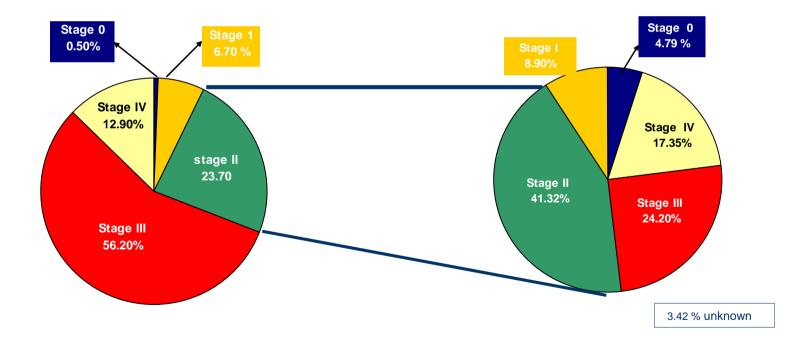

Breast Cancer Program results to date

- Total women reached with teaching self breast exam and referral: 778,500 age 15-60
- Breast symptom referrals: 8500, 59% acted upon
- New cases of breast cancer detected: 121 out of 4500 referral visits
- Establishment of National Early Detection Program, development of national guidelines and policies in process

Early Signs of Success in Downstaging

Stages of breast Cancer in Jordan based on KHCC Experience 2005/2006 Stages of breast Cancer in Jordan based on KHCC Experience 2006/2007

Lessons and Challenges

- Outreach in homes can educate and stimulate demand for services – both FP and breast cancer
- Women are interested in holistic approach improves effectiveness of FP/RH messages
- Breast cancer can be integrated into FP outreach efficiently and effectively

High quality referral system is absolutely key !
